SUMMARY

Results-driven Software Developer with a Bachelor's degree in Bsc in Information Technology specialized Software Engineering and 2+ year of experience building production-grade enterprise full-stack applications. Strong hands-on expertise in JavaScript, TypeScript, ReactJS, NodeJS, ExpressJS, Next.js, and Redux, with experience integrating RESTful and GraphQL APIs. Solid understanding of database design(SQL,NOSQL), service and API design & error handling, responsive design, and modern app performance standards. Proven team player in Scrum-based Agile environments, delivering high-quality software aligned with Cloud Solutions.

WORK EXPERIENCE

Associate Software Engineer

December 2025 - Present

Acentura Inc

- Developed optimized scalable applications using NodeJS, ExpressJS, MySQL, AWS, Docker, Microservice.
- Conducted code reviews, mentorship, and technical guidance for junior developers to maintain code quality and improve team productivity.
- Experienced with Database design, Git best practices, Agile (Scrum), and CI/CD pipelines for reliable deployments.

Trainee Software Engineer

June 2025 - December 2025

Acentura Inc

- Designed and developed scalable web applications using React.js, Redux, MUI, with Typescript.
- Built large-scale frontends using micro-frontend architecture backend with microservice architecture, deploy with AWS and maintainable solutions aligned with business goals.
- Modernized frontend applications by upgrading React (Vite) versions, fixing deprecated packages, and supporting the migration of legacy Angular applications to React

Freelance Software Engineer

February 2025 - Present

- Experienced in working directly with clients, maintaining effective communication, developing applications in alignment with the Software Development Life Cycle (SDLC), delivering projects within agreed deadlines, and deploying applications using Vercel.
- Improved application performance and SEO through code optimization, maintain code quality and experienced best practises in software engineering.

Intern Software Engineer

October 2024 - June 2025

Active Digital Labs

- Developed responsive full-stack applications using NodeJS, React, Redux & Tailwind CSS.
- Integrated RESTful API while applying responsive design principles and optimizing browser rendering for high-performance, efficient web applications
- An entry-level front-end role involving code reviews, technical discussions, and debugging support, get experience aligned with build tools like webpack, vite.

EDUCATION

B.Sc.(Hons) in Information Technology (Specializing in Software Engineering)
Sri Lanka Institute of Information Technology (SLIIT)

2021 – 2025

PROJECTS

Athena HRM - NodeJS, ExpressJS, MySQL, AWS, Docker

- A complex web-based HRM system managing company operations that Developed based on micro-service architecture.
- Including Comprehensive time & timesheet tracking for employees, leave management, Dynamic report generation for data-driven insights, User profile management for secure and personalized access.
- Handling complex API designs and full-cycle leave management including lot of user roles such as Employee, Supervisor, Project Manager and HR roles supported.

BrewOne - NextJS , Redux Toolkit , TypeScript , MaterialUI , Redux Saga

- Built with Next.js to manage end-to-end tea supply chain operations.
- Implements Tea Board reporting, approval workflows, and shipment tracking to ensure regulatory compliance and transparent delivery management.
- Streamlines the complete tea lifecycle, including cataloguing, blending, ordering, and packing, to ensure smooth and efficient operational flow.

Olympus - React , Redux Toolkit , TypeScript , MaterialUI , Redux Logger, AWS Amplify

- Built an admin portal to manage end-to-end software company operations from a single platform.
- Handles CRUD management of company assets, employees, resignations, and organizational structures (SBUs, teams, clients) and RESTful API integration.
- Implements role-based access control with entitlements and integrated leave calculation & management.
- Supports hierarchical project assignment and employee mapping across teams, SBUs, and clients.

TECHNICAL SKILLS

- | | |
|--------------------------------|--|
| • Languages | - JavaScript |
| • Frontend Technologies | - HTML, ReactJS, NextJS, MaterialUI, Tailwind CSS, Redux Toolkit, Redux Saga |
| • Backend Technologies | - NodeJS, ExpressJS |
| • Cloud Technologies | - AWS, Docker, Github Actions, Vercel |
| • Testing | - Cypress, Jest |
| • Version Control | - Git (Github, Bitbucket) |
| • Others | - RESTful APIs, Microservices, Agile, Scrum, MicroFrontend |
| • Build Tools | - Vite, Webpack |
| • Databases | - MySQL, MongoDB |

AWARDS

SLIIT Bashway Coding Challenge
(1st Runner-up)

2023
